| Not Available (PAO's) – No occupational exposure limits known |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Exposure Controls                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Appropriate engineering controls                              | <p>General exhaust is adequate under normal operating conditions. Engineering controls are used to remove a hazard or place a barrier between the worker and the hazard. Well-designed engineering controls can be highly effective in protecting workers and will typically be independent of worker interactions to provide this high level of protection.</p> <p>The basic types of engineering controls are:</p> <ul style="list-style-type: none"> <li>• Process controls which involve changing the way a job activity or process is done to reduce the risk.</li> <li>• Enclosure and/or isolation of emission source which keeps a selected hazard "physically" away from the worker and ventilation that strategically "adds" and "removes" air in the work environment.</li> </ul>                                                                                                                                                  |
| Respiratory protection                                        | <ul style="list-style-type: none"> <li>• If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate.</li> <li>• Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable.</li> <li>• Types of respirators to be considered for this material include: <ul style="list-style-type: none"> <li>• Particulate</li> <li>• No special requirements under ordinary conditions of use and with adequate ventilation.</li> </ul> </li> <li>• For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapour warning properties are poor, or if air purifying filter capacity/rating may be exceeded.</li> </ul> |
| Personal protection                                           | <p>Personal protective equipment selections vary based on potential exposure conditions such as applications, handling practices, concentration and ventilation.</p> <p>Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| SECTION 11 TOXICOLOGICAL INFORMATION |                                                                                                                                                                                                                                                                                                                                                                                      |                          |                                           |
|--------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|-------------------------------------------|
| Information on toxicological effects |                                                                                                                                                                                                                                                                                                                                                                                      |                          |                                           |
| Inhaled                              | The material is not thought to produce adverse health effects or irritation of the respiratory tract (as classified by EC Directives using animal models).<br>Nevertheless, good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting.<br>Not normally a hazard due to non-volatile nature of product. |                          |                                           |
| Ingestion                            | Ingestion is unlikely to have any toxic effects, but the product may act as an intestinal lubricant and result in diarrhea and frequent loose stools. If vomiting occurs aspiration may cause delayed pulmonary edema and chemical pneumonia.                                                                                                                                        |                          |                                           |
| Skin Contact                         | The material is not thought to produce adverse health effects or skin irritation following contact (as classified by EC Directives using animal models).<br>Nevertheless, good hygiene practice requires that exposure be kept to a minimum and that suitable gloves be used in an occupational setting.                                                                             |                          |                                           |
| Eye                                  | Although the material is not thought to be an irritant (as classified by EC Directives), direct contact with the eye may produce transient discomfort characterised by tearing or conjunctival redness (as with windburn).                                                                                                                                                           |                          |                                           |
| Chronic                              | Long-term exposure to the product is not thought to produce chronic effects adverse to the health (as classified by EC Directives using animal models); nevertheless exposure by all routes should be minimised as a matter of course.                                                                                                                                               |                          |                                           |
