

SECTION 1 IDENTIFICATION OF T	HE SUBSTANCE/MIXTURE AND OF THE COMPANY / UNDERTAKING
Product Identifier	
Product Name	Guardian FOODGUARD Multi Oil S 68
Synonyms	Guardian Food Grade Lubricants
Other means of identification	Not Available
Relevant identified uses of the s	ubstance or mixture and uses advised against
Relevant identified uses	Lubricants used in the food industry
Details of the supplier of the safe	ety data sheet
Registered company name	Guardian Food Grade Oils Pty Ltd
Address	42 Kimberly Road Dandenong South Vic Australia 3175
Telephone	Within Australia 03 9213 4777 International +613 92134777
Website	www.fgoils.com.au
Email	info@fgoils.com.au
Emergency Telephone number	
Association / Organisation	Not Available
Emergency Telephone	Within Australia 03 9213 4777 International +613 9213 4777
Numbers	13126 24 Hours Emergency Contact
Other emergency numbers	Not Available

SECTION 2 HAZARDOUS IDENTIFI	CATION			
Not classified as hazardous under t	he Globally H	armonised System (GHS).		
Poisons Schedule	Not Applicable			
Classification	Not Applic	able		
GHS label elements	This produ	ict has no label elements		
SIGNAL WORD	NOT APPL	ICABLE		
Hazard Statement(s)		Non-Hazardous		
Precautionary statements(s) Pres	vention	Not Applicable		
Precautionary statements(s) Response		P301 + P310 IF SWALLOWED: Immediately call a POISON CENTRE or Doctor / Physician P331 Do NOT induce vomiting		
Precautionary statements(s) Storage		Not Applicable		
Precautionary statements(s) Disposal		<b>P501</b> Dispose of contents/container in accordance with local / regional / national / international regulations		

SECTION 3 COMPOSITION / INFOR	MATION ON INGREE	DIENTS	
Substances			
See section below for composition	of Mixtures		
Mixtures			
CAS No.	% (Weight)	Name	
Not Available 100 Ingredients determined to be non hazardous			

SECTION 4 FIRST AID MEASURES	
Description of first aid measures	
Eye Contact	If this product comes in contact with eyes:
	Flush thoroughly with water. If irritation occurs, get medical assistance.
	Wash out immediately with water.
	<ul> <li>Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.</li> </ul>
Skin Contact	If skin or hair contact occurs:
	Flush skin and hair with running water (and soap ifavailable).

	<ul> <li>Seek medical attention in event of irritation.</li> </ul>		
Inhalation	Remove from further exposure.		
	<ul> <li>For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection.</li> </ul>		
	<ul> <li>If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek immediate medical assistance.</li> </ul>		
	• If breathing has stopped, assist ventilation with a mechanical device or use mouth-to- mouth resuscitation.		
Ingestion	If swallowed do NOT induce vomiting.		
	<ul> <li>If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration.</li> </ul>		
	Observe the patient carefully.		
	<ul> <li>Never give liquid to a person showing signs of being sleepy or with reduced awareness; i.e. becoming unconscious.</li> </ul>		
	<ul> <li>Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink.</li> </ul>		
	Seek medical advice.		

Treat symptomatically.

#### **SECTION 5 FIREFIGHTING MEASURES**

## Extinguishing media

- Foam
- Dry Chemical Powder

<ul> <li>Carbon Dioxide</li> </ul>	
Special Hazards arising from	the substance or mixture
Fire Incompatibility	Avoid contamination with oxidising agents i.e. nitrates, oxidising acids, chlorine
	bleaches, pool chlorine etc. as ignition may result
Advice to firefighters	
Fire fighting	Evacuate area.
	<ul> <li>Prevent run-off from fire control or dilution from entering streams, sewers or drinking water supply.</li> </ul>
	<ul> <li>Fire-fighters should use standard protective equipment and in enclosed spaces, self- contained breathing apparatus (SCBA).</li> </ul>
	<ul> <li>Use water spray to cool fire exposed surfaces and to protect personnel.</li> </ul>
Fire/Exposure Hazard	Combustible - AS1940 Combustible class: C2
	• Slight fire hazard when exposed to heat or flame.
	Heating may cause expansion or decomposition leading to violent rupture of containers.
	• On combustion, may emit toxic fumes of carbon monoxide (CO).
HAZCHEM	Not Applicable

#### SECTION 6 ACCIDENTAL RELEASE MEASURES Personal precautions, protective equipment and emergency procedures See section 8 **Environmental precautions** See section 12 Methods and material for containment and cleaning up **Minor Spills** Slippery when spilt. • Clean up all spills immediately. • Avoid contact with skin and eyes. • Wear impervious gloves and safety glasses. • Place spilled material in a clean, dry, sealable, labelled container. **Major Spills** Slippery when spilt. • Clear area of personnel and move upwind. • Alert Fire Brigade and tell them location and nature of hazard. • Control personal contact with the substance, by using protective equipment.

Prevent spillage from entering drains, sewers or watercourses.
 Personal Protective Equipment advice is contained in Section 8 of the SDS.

SECTION 7 HANDLING AND STO	DRAGE
Precautions for safe handling	
Safe Handling	Limit all unnecessary personal contact.
	• Wear protective clothing when risk of exposure occurs.
	• Use in a well-ventilated area.
	When handling DO NOT eat, drink or smoke.
Other information	• Store in original containers.
	• Keep containers securely sealed.
	<ul> <li>No smoking, naked lights or ignition sources.</li> </ul>
	• Store in a cool, dry, well-ventilated area.
Conditions for safe storage, inc	luding any incompatibilities
Suitable container	• Polyethylene or polypropylene container.
	• Packing as recommended by manufacturer.
	<ul> <li>Check all containers are clearly labelled and free from leaks.</li> </ul>
Storage incompatibility	Avoid storage with oxidisers

SECTION 8 EXPOSURE CONTRO	DLS / PERSONAL PROTECTION
Control Parameters	
OCCUPATIONAL EXPOSURE LI	
	upational exposure limits known
Exposure Controls	
Appropriate engineering	General exhaust is adequate under normal operating conditions.
controls	Engineering controls are used to remove a hazard or place a barrier between the worker and the hazard. Well-designed engineering controls can be highly effective in protecting workers and will typically be independent of worker interactions to provide this high level of protection.
	The basic types of engineering controls are:
	• Process controls which involve changing the way a job activity or process is done to reduce the risk.
	• Enclosure and/or isolation of emission source which keeps a selected hazard "physically" away from the worker and ventilation that strategically "adds" and "removes" air in the work environment.
Respiratory protection	<ul> <li>If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate.</li> <li>Respirator selection, use, and maintenance must be in accordance with regulatory requirements if eachiesele.</li> </ul>
	requirements, if applicable.
	<ul> <li>Types of respirators to be considered for this material include:</li> <li>Particulate</li> </ul>
	<ul> <li>Particulate</li> <li>No special requirements under ordinary conditions of use and with adequate ventilation.</li> <li>For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapour warning properties are poor, or if air purifying filter capacity/rating may be exceeded.</li> </ul>
Personal protection	Personal protective equipment selections vary based on potential exposure conditions such as applications, handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.

Eye and face protection	Safety glasses with side shields; or as required
	Chemical goggles.
	• Contact lenses may pose a special hazard; soft contact lenses may absorb and concentrate irritants. A written policy document, describing the wearing of lenses or restrictions on use, should be created for each workplace or task. This should include a review of lens absorption and adsorption for the class of chemicals in use and an account of injury experience.
Skin protection	See Hand protection below.
Hands/feet protection	Wear general protective gloves, eg. light weight rubber gloves.
Body protection	See Other protection below.
Other protection	No special equipment needed when handling small quantities. OTHERWISE:
	Overalls
	Barrier cream
	Eyewash unit
Thermal hazards	Not Available

### SECTION 9 PHYSICAL AND CHEMICAL PROPERITIES

#### Information on basic physical and chemical properties.

Note: Physical and chemical properties are provided for safety, health and environmental considerations only and may not fully represent product specifications. Contact the Supplier for additional information.

Appearance	Colourless			
Physical state	Oil	Relative density (Water = 1)	0.86	
Odour	Odourless	Partition coefficient n-octanol / water	Not Available	
Odour threshold	Not Applicable	Auto-ignition temperature (°C)	Not Available	
pH (as supplied)	Not Applicable	Decomposition temperature	Not Available	
Freezing point (°C)		Viscosity (cSt)	Not Available	
Initial boiling point and boiling range (°C)	Not Available	Molecular weight (g/mol)	Not Applicable	
Flash Point (°C)	>150	Taste	Not Available	
Evaporation rate	Not Available	Explosive properties	Not Available	
Auto Flammability	>200	Oxidising properties	Not Available	
Upper exposure limit (%)	Not Available	Surface Tension (dyn/cm or mN/m)	Not Available	
Lower exposure limit (%)	Not Available	Volatile Component (% Vol)	Not Available	
Vapour pressure (kPa)	Negligible	Gas group	Not Available	
Solubility in water (g/L)	Insoluble	pH as a solution (1%)	Not Available	
Vapour density (Air = 1)	Not Available	VOC g/L	Not Available	

SECTION 10 STABILITY AND REACTIVITY		
Reactivity	See Section 7	
Chemical Stability	<ul><li>Unstable in the presence of incompatible materials.</li><li>Product is considered stable.</li></ul>	
Possibility of hazardous reactions	See section 7	
Conditions to avoid	Excessive heat. High energy sources of ignition. Additionally see section 7	
Incompatible materials	Strong oxidisers. Additionally see section 7	
Hazardous decomposition	See section 5	

products

## FOODGUARD Multi Oil S 68 SAFETY DATA SHEET

SECTION 11 TOXICOLOGICAL					
Information on toxicological effects           Inhaled         The material is not thought to produce adverse health effects or irritation of the				tation of the respiratory tract	
	(as classified by EC Directives u				
	control measures be used in ar	•	• •	to a minimum and that suitable	
	Not normally a hazard due to n	•	-		
Ingestion		•	• •	ect as an intestinal lubricant and	
	result in diarrhea and frequent		-	ation	
	, , , ,	may cause delayed pulmonary edema and chemical pneumonia.The material is not thought to produce adverse health effects or skin irritation following contact			
Skin Contact	(as classified by EC Directives u			n irritation following contact	
		-		to a minimum and that suitable	
	gloves be used in an occupational setting.				
Eye	-	Although the material is not thought to be an irritant (as classified by EC Directives), direct contact			
		with the eye may produce transient discomfort characterised by tearing or			
	conjunctival redness (as with w			·	
Chronic	Long-term exposure to the product is not thought to produce chronic effects adverse to the health (as classified by EC Directives using animal models); nevertheless exposure by all				
	routes should be minimised as a matter of course.

# SECTION 13 DISPOSAL CONSIDERATIONS Waste Treatment methods Disposal recommendations based on material as supplied.

Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal.

Product / Packaging disposal	• Recycle wherever possible or consult manufacturer for recycling options.	
	<ul> <li>Consult State Land Waste Management Authority for disposal.</li> </ul>	
	<ul> <li>Bury residue in an authorized landfill.</li> </ul>	
	<ul> <li>Recycle containers if possible, or dispose of in an authorized landfill.</li> </ul>	

Land transport (ADG): NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS Air transport (ICAO-IATA / DGR): NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS Sea transport (IMDG-Code / GGVSee): NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS Transport in bulk according to Annex II of MARPOL and the IBC code Not Applicable

#### SECTION 15 REGULATORY INFORMATION

Safety, health and environment regulations / legislation specific for the substance or mixture

This material is not considered hazardous according to Australia Model Work Health and Safety Regulations. Product is not regulated

according to Australian Dangerous Goods Code.

AS1940 COMBUSTIBLE CLASS: C2

National inventory	Status
Australia - AICS	Listed
Canada - DSL	Not Determined
China - IECSC	Not Determined
Europe – EINEC / ELINCS / NLP	Not Determined
New Zealand - NZIoC	Not Determined
USA - TSCA	Not Determined

## SECTION 16 OTHER INFORMATION

Date of Issue	Tuesday, 19 September 2017
Abbreviations	ADG = Australian Dangerous Goods
	GHS = Globally Harmonised System of Classification and Labelling of chemicals
	IATA = International Air Transport Association
	IBC = Intermediate Bulk container
	IMDG = International Maritime Dangerous Goods
	STEL = Short term exposure limit
	TWA = time weighted average

#### Other Information

The information contained in this SDS is as accurate as we can ascertain at this time. However, as the information is gleaned from a number of third party sources, Guardian Food Grade Oils Pty Ltd can make no warranty, guarantee or statement as to the reliability or completeness of the information. Guardian Food Grade Oils Pty Ltd will not accept liability of any damages whatsoever arising from the reliance of this information. It is the responsibility of the person handling the product to satisfy themselves as to the suitability and completeness of such information for their own use. You can contact Guardian Food Grade Oils Pty Ltd to ensure that this document is the most current available.
